PROFILE

Full Stack Developer focused on product development, with experience building complete web applications using React, Node.js, and SQL/NoSQL databases.

Capable of designing, implementing, and integrating systems with real business logic, including authentication, role management, and process automation.

Strong focus on user experience (UX/UI) and on building functional, scalable, and maintainable solutions.

HIGHLIGHTED PROJECT

virtual Campus (Full Stack Application)

Complete web application focused on educational management.

- Implementation of an authentication system with role separation (admin, teacher, student)
- Backend development with Node.js and Express, structured with a modular architecture
- Database integration (SQL/NoSQL) for user, course, and content management
- Automatic generation of multiple-choice exams through AI integration
- Frontend developed with React with a focus on user experience
- Clear separation between frontend and backend (decoupled architecture)
- Deployed and fully functional application

Stack: React, TypeScript, Node.js, Express, SQL, MongoDB, Tailwind

EXPERIENCE

Full Stack Web Developer

May 2022 – Present

- Development of web applications using React, Node.js, and relational and non-relational databases
- Implementation of REST APIs and business logic for custom systems
- Frontend/backend integration ensuring data consistency and user experience
- Development of modern interfaces focused on usability and performance
- Troubleshooting technical issues in real-world environments and adapting to changing requirements

Technical Support

Iptel — Córdoba, Argentina

Abril 2018 – Mayo 2022

- Comprehensive technical support in hardware, software, and networking

- Diagnosis and resolution of incidents in Windows and Linux operating systems
- Database queries and manipulation (SQL Server)
- Network configuration, IP telephony, and email services
- Installation and maintenance of technological infrastructure

Security Officer

Omega Seguridad — Córdoba, Argentina

Mayo 2014 – Abril 2018

- Monitoring security systems and incident prevention
- Access control and facility supervision
- Event logging and reporting with a focus on accuracy and responsibility

EDUCATION

- **Higher Technical Degree in Systems Analysis** (*currently in progress*)
Instituto Superior de Formación Técnica N° 114
- **High School Diploma**
Major in Economics and Administration

ADDITIONAL TRAINING

- Full Stack Web Developer — Argentina Programa (800 hrs)
- Full Stack Web Developer — Henry Bootcamp (900 hrs)
- Social Media Lab Internship (feature development and UX improvements)

SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** React, Redux, Tailwind
- **Backend:** Node.js, Express
- **Databases:** SQL, MongoDB
- **ORM/ODM:** Sequelize, Mongoose
- **Tools:** Git, Firebase, Figma

LANGUAGES

- Inglés B2, Upper Intermediate.
